SKILLS

Programming Languages

Javascript, ES6, OOPS

Back-End

Node.js, Express.js, Typescript

Front-End

React, HTML, CSS, Bootstrap

Database

MongoDB, MySQL, Redis

Tools

mongoose, Docker, Jest, AWS

PostMan, NPM, Git, AWS-S3, Depl.

PERSONAL PROJECTS

User Registration and Login Portal

Our project employs Node.js and Express.js for the backend, MongoDB for data storage, and JWT authentication for security. – We're building a scalable web application with user authentication, data management, and a RESTful API. Currently in development, our focus is on delivering a secure and efficient platform.
https://github.com/krishna020/login_portal/tree/master

Product Management

Our project utilizes a tech stack including AWS SDK, Bcrypt, body-parser, Jsonwebtoken, mongoose, multer, and nodemon. We're building a feature-rich –web application with robust security features, data storage, and file handling capabilities. Currently in development, Our focus is on creating a scalable and secure platform.
