As a devoted Full-Stack Developer with a passion for the intersection of user interfaces and backend systems, I aspire to excel within Ayans, harnessing my React.js and Laravel proficiency. My objective is to contribute to the creation of scalable and intuitive web applications that drive user engagement and business success, aligning with Ayans' commitment to technological innovation and user-centric design.

## Professional Summary

- 1+ year experience as React JS Developer, focusing on building responsive UI components and seamless user interfaces.
- Proficient with fundamental web technologies—JavaScript, HTML, CSS—and libraries like Redux for effective state management.
- Skilled in employing React.js paired with Node.js and Laravel for complete full-stack development and integration.
- Excel in creating visually appealing interfaces, translating designs into efficient code while ensuring high performance.
- Demonstrated capacity for identifying and addressing performance bottlenecks, optimizing rendering processes significantly.
- Excellent record in debugging complex issues, enhancing usability and reliability within time-sensitive environments.
- Proven collaboration skills with cross-functional teams, leading to the successful delivery of full-featured web applications.

## Career Timeline

Aug 2022 - Present

**Web Developer**  
AyanshTech Solutions

## Work Experience

Aug 2022 - Present

### Web Developer

AyanshTech Solutions

#### Workdone:

- Diagnosed and resolved complex bugs and issues in React applications, efficiently identifying root causes and implementing effective solutions within tight deadlines
- Conducted code reviews and identified performance bottlenecks in React components, leading to code refactoring and optimizing rendering processes, resulting in a 15% improvement in application load times
- Implemented reusable components and integrated them into existing projects, reducing development time by 20% and ensuring consistency across applications
- Collaborated with senior developers to integrate React components with Laravel-based back-end systems, resulting in seamless communication between front-end and back-end, and delivering fully functional applications
- Developed and maintained front-end features using React for multiple web applications, contributing to enhanced user experiences and improved performance

#### Achievements

- Engineered a customized reporting feature enabling the creation of PDF reports, along with recording and emailing of audio and video content to client email addresses

## Soft Skills

- Critical Thinking
- Time Management
- Adaptability
- Collaboration
- Communication

## Technical Skills

JavaScript (ES6+)	<div><div></div><div></div><div></div><div></div><div></div></div>
Responsive Design	<div><div></div><div></div><div></div><div></div><div></div></div>
Node.js	<div><div></div><div></div><div></div><div></div><div></div></div>
Laravel Framework	<div><div></div><div></div><div></div><div></div><div></div></div>
Redux State Management	<div><div></div><div></div><div></div><div></div><div></div></div>

## Core Competencies

- React.js Development
- Backend API Development
- Front-End Integration
- Performance Optimization
- UI/UX Design
- Problem-solving

## Certifications

- React.js Development Certification 2022
- Full Stack Web Development 2021

## Education

- B.Tech  
Rajkiya Engineering College  
AUG 2017 - AUG 2021
- 12th  
Central Academy  
MAY 2015 - MAY 2016

## Languages

- English
- Hindi

## Hobbies

- Contributing to open-source projects
- Experimenting with interactive web design

- Developed a robust API using Laravel to facilitate seamless communication and data exchange for the custom report functionality
- Designed and developed a customized calendar that displays dynamic client data
- Developed nested Tabs within each TabPanel to enhance user interface, optimizing project organization
- Implemented dynamic URL parameter handling using JavaScript, ensuring seamless navigation and improved user experience

## Achievements

---

- Successfully designed and integrated reusable components, cutting development time by 20% and standardizing application interfaces.
- Led initiatives to diagnose and resolve complex bugs, optimizing React components for a 15% increase in application load time efficiency.

## Projects

---

### Averti System

- Created custom PDF reporting features and multimedia management tools.
- Designed dynamic client forms and complex reporting interfaces with React.js.
- Built a robust API using Laravel for optimal frontend and backend interaction.
- Implemented nested tabs and advanced URL parameter handling for superior UX.
- Designed a custom calendar for display and management of client data.

### Ride-share-matrix

- Upheld task completion within aggressive timelines, maintaining quality.
- Ensured full-stack integration with robust Laravel backend systems.
- Managed front-end development with JavaScript, AJAX, and Bootstrap.
- Conceived and executed a strategic Driver Details framework.
- Demonstrated acute problem-solving in streamlining data management.
