### PROFILE

A full-stack web developer with skills in React.js, Node.js, Express.js, and MongoDB can develop and maintain web applications end-to-end, including front-end and back-end development.

### PERSONAL PROJECTS

#### URL SHORTENER |

A fast and efficient URL shortener API built with Node.js, Express.js, and MySQL. This API allows you to create shortened versions of long URLs, making them easier to share and manage. It provides analytics on URL usage, including the number of clicks and visitor information.

- **Features** : Signup | Login | Email Verification | Forgot Password | Admin | Short URL | Copy to Clipboard | Update | Delete | more.
- **Tech Stack** : React | JavaScript | Node.js | Express.js | MySQL.
- **Note** : This project was collaboratively built by a team of three developers and executed in around 30 days.

#### CONNECTING TARIK SHOP |

Connecting Tarik is the most famous electronic shop in my nearest city. They sell smartphones, headphones, mobile chargers, and other smartphone accessories. They wanted me to build their website, so by using this site, they can enhance the customer experience. Now customers can see the prices, stock availability, and other information.

- **Features** : Login | Email Verification | Forgot Password | Admin | Manage Products | Add Product | Update Product | Delete Product | Youtube Videos | Upload Customer's Photos | Crousel for Announcement | etc.
- **Tech Stack** : React | Node.js | Express.js | MongoDB | Firebase.
- **Note** : This project was collaboratively built by a team of three developers and executed in around 30 days.
