- TypeScript
- HTML
- CSS
- MERN
- React.JS
- Node.JS
- Next.JS
- PHP
- Express.JS
- Three.JS
- MongoDB
- Firebase
- Tailwind/ Bootstrap/ Chakra UI
- Redux/ toolkit / Context API
- Python
- Github

## Experience

**1-2022 – Present**

**ADDICOR TECHNOLOGIES PVT.LTD, Noida, India**

Company website link- <https://addicortechnologies.com/>

I have two years of hands-on experience working with MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js. In simple terms, I've been building websites and web applications using these technologies. Whether it's creating the visual parts of a website, making sure it works smoothly behind the scenes, or improving its speed and performance, I've been involved in all aspects. I've also specialized in using Next.js, a tool that helps make websites load faster and perform better. Overall, my experience in MERN and Next.js means I'm well-equipped to handle various web development tasks effectively. I have a good mix of skills in MERN and Next.js, which helps me solve tricky web development problems quickly and effectively.

## Education & Training

**4-2022 – 10-2022 (online course)**

**Full Stack Web Development Program (MERN) / CS**

**10x Academy, Telangana**

**8-2016 – 10-2020**
