## EDUCATION

**Deen dayal upadhyaya gorakhpur university**

**2024**

*B.Com - Bachelor of Commerce - **SGPA - 7.4***

*Gorakhpur, Uttar Pradesh*

## EXPERIENCE

**Full Stack Developer- Call Your Dhobi**

**October 2022 -May2024**

- Spearheaded the enhancement of customer interactions through the development and optimization of custom CRM solutions, improving overall client satisfaction and operational efficiency.
- led the migration of legacy systems to AngularJS, using its MVC structure. Integrated core PHP features, such as session management for user authentication, and utilized object-oriented programming principles to create reusable code.
- Developed dynamic product pages using PHP for server-side scripting, JSON for data display, and MySQL for effective database management.

**Front End Developer Intern- Growth Guide**

**July 2022 - September 2022**

- Designed and optimized front-end components for client websites, focusing on enhancing user experience and boosting search engine performance.
- Crafted visually appealing and responsive front-end designs utilizing HTML, CSS, and JavaScript, seamlessly integrated with PHP to deliver dynamic content. Focused on enhancing user engagement through intuitive layouts and interactive features that adapt flawlessly across devices.

## PROJECTS

**Real-Time Chat Application** [🔗](#) | [PHP](#), [MySQL](#), [AJAX](#), [Javascript](#)

**August 2024**

- Developed a Java-based blogging platform with JSP, Servlets, MySQL, and JDBC, enabling user registration, blog creation, and content management.
- Implemented efficient SQL queries using JDBC resulting in an average query response time of less than 50 milliseconds
- Focused on cross-browser compatibility and responsive design principles for seamless user experiences.

**Reels Upload and Retrieval System** [🔗](#) | [PHP](#), [RESTful API](#), [MySQL](#), [HTML](#), [CSS](#), [JavaScript](#)

**June 2024**

- Developed a robust Reels Storage API using PHP to facilitate the upload, retrieval, and management of video reels. Implemented secure authentication mechanisms to protect user data and ensure privacy.
- Designed an efficient database schema using MySQL for storing metadata associated with each reel, enabling quick access.
- Implemented RESTful API endpoints to allow seamless integrations.

**Billing System** [🔗](#) | [PHP](#), [MySQL](#), [HTML](#), [CSS](#), [JavaScript](#)

**December 2023**

- Designed and implemented a comprehensive billing system that allows secure user authentication, enabling users to create accounts, log in, and manage their bills.
- Enabled users to generate and manage invoices effortlessly, featuring itemized billing for goods and services provided. Users can add, edit, and delete entries, streamlining the billing process and enhancing user experience. The system also includes functionality for tracking daily profit and loss and processing payments through cash and UPI, providing valuable financial insights.

## TECHNICAL SKILLS

- **Languages:** PHP, JavaScript
- **Technologies/Frameworks:** HTML5, CSS3, Bootstrap, Laravel
- **CMS:** Shopify, Wordpress
- **Developer Tools:** VS Code, Canva,
