## PROJECTS

### Python Web Scrapping

06/2023 - 07/2023    Online

Developed a Python web scraping script using Beautiful-Soup and Requests library. Extracted data from amazon to gather Laptop specification. Implemented ,analyzed, managed and facilitated data cleaning and transformation techniques.Presented results in a CSV/Excel format.

### • The Perfect Guess(Using Python)

05/2023    Online

This game is developed by generating a random number and asking the user to guess it. If the player thinks it is higher than the actual number, the program displays "Lower number please". Similarly, if the user's guess is too low, the program prints "Higher number please".
