Virtusa

commission app:

virtusa commission app mentioned backend data we have two modules. One is Dashboard another one is Invoice. This Application build with Reacts and Blockchain, helping team to make code in React making REST web service with authentication and performance tuning of application to make user experience better.

Roles:

- Used Agile methodology and attended daily and weekly SCRUM meetings to update working status etc.
- Created reusable components used across various modules using React JS.
- Developed Single Page Application which can switch to different components using React
- Use various features in React JS like routing to meet various customized requirements.
- Use the http services in React JS to make API calls and exchange data in JSON.
- Developing back-end API using node JS.
- Design the UI based on client need.

Tools/Frameworks: HTML5, CSS3, JavaScript (ES6), React JS, Redux, Nodejs, Express JS, MongoDB, AWS concepts.

Class room:

Class Room is a massive open online education provider for students and working adults. There are two types of programme users: super admin and admin. There are six sections. Health and fitness, business, marketing, and personal growth are added later to make this general Web application a single page application. As a technical lead, your responsibilities include managing sprints, use case analysis, project estimation, client contact, helping the team write React code for REST web services with authentication, and optimizing the performance of your application to improve user experience.

- Used Agile methodology and attended daily and weekly SCRUM meetings to update working status etc.
- Created reusable components used across various modules using React JS.
- Developed Single Page Application which can switch to different components using React
- Use various features in React JS like routing to meet various customized requirements.
- Use the http services in React JS to make API calls and exchange data in JSON.
- Developing back end API using node JS.
- Design the UI based on client need.
- Define the work flow and workflow navigations were developed to work per the user roles.
- Monitoring of Designing of Web Pages using (HTML5, CSS3, JavaScript) as Team Lead
- Experienced merging branches in GIT and review the code before merging

Tools/Frameworks: HTML5, CSS3, JavaScript (ES6), React JS, Redux, Nodejs, Express JS, MongoDB, AWS concepts.

🎓 Education

2016 - 2019

B.C.A

Vidya Vahini First Grade College. Tumkur

2014 - 2016

PUC

Sir Mv Pu College. Davanagere

2013 - 2014

10th

Sri Vasavi Vidya Nikethana. Challakere
