

Mohd Anas Khan

Tel: 9140742068 | Email: anaskhan20221996@gmail.com

Rajiv Nagar, Indira Nagar, Lucknow 226016

Birthday: 20th December, 1996

Objective

Seeking a challenging position in an organization where I can use my talents and skills to grow and expand an organization as well as myself.

Work Experience

XRM Labs

06/2021 - Nowadays

Software Engineer

Worked as Javascript, jQuery frontend developer for 1.7 years

Client Projects :-

Kooltrack - Kooltrack is a UK based cooling equipment and maintenance based company project for management of rented cylinders. Worked on cylinder collection and return form. Query master for creating API using SQL and Javascript, jQuery for frontend.

Created a calendar with events highlights and details page redirect using the TUI Calendar API. Added navigation bar and filter support to the calendar to filter out events as per branch and accounts

Made a global search bar and ported it as module using DNN based module template using .NET Framework 4.8

Certum - Certum is a UK based sales company project used for sales management. Created the main dashboard with

Leads and Contacts list with line of business and accounts type filter support and tiles with percentage and colour coded representation of the number of sales per line of business.

Worked on design and working of Profit Matrix (Dynamic sales management table) to track item leads and contracts

Used Javascript, jQuery, jQueryUI, Bootstrap for frontend and Query Master module for API using SQL

CleanNet Timesheet - CleanNet is a US based cleaning and furnishings company project for management of employees login and salary. Worked on its home page using SVG clock and login, logout time tracker with support for miscellaneous time entries, timezone support, week wise time records views and bulk submit for approval. Used Javascript, jQuery, Bootstrap, Dayjs libraries for frontend and Query Master module for API development using SQL

Euro System - Euro System is a US based company project for sales management.

Added used details and accounts support to existing system using .NET Framework Web Form and Javascript for frontend and XML API calls from Dynamic 365 based CRM server
