WORK EXPERIENCE

Mern Stack Developer

Present

Mark Soft Line | Hyderabad

- Serving as the Project lead, responsible for guiding project development and ensuring cohesive collaboration within the team.
- Designing and implementing code architecture, laying the groundwork for efficient development and scalability of project.
- Providing clear direction and guidance to team members for efficient coding practices and project execution.
- Collaborating closely with the team to identify and resolve production errors, ensuring seamless operation of application.
- Working collaboratively with the team on both front-end and backend development, utilizing React, Node.js, and Express to drive project

JR Software Developer

Feb 2023 – Dec 2023

Dream Hyre | Visakhapatnam

- Demonstrated adept time management skills while working closely with the team, ensuring efficient project progress
- Engaged in a collaborative effort with Neoscript for the Yodaskill project, enhancing functionalities and optimizing performance.
- Participated actively in code reviews and debugging sessions, enhancing the overall quality and reliability of the software products.
- Actively participated in daily stand-up calls, providing updates on tasks completed, current progress, and any blockers encountered, facilitating transparent communication within the team.
- Collaborated effectively with senior team members, offering valuable assistance and support during all project phases, ensuring seamless workflow and successful project outcomes.

Mern stack developer Intern

Nov 2022 – Jan 2023

Dream Hyre | Visakhapatnam

- Applied knowledge gained in HTML, CSS, JavaScript, React, MongoDB, Node.js, and Express.js to real-world projects during the internship.
- Successfully balanced internship responsibilities with academic commitments during the final year of studies, effectively managing time to meet deadlines in academic requirements.
- Demonstrated the ability to troubleshoot and resolve technical issues encountered during the development process, showcasing problem-solving skills and a proactive approach to challenges.

PROJECTS

Pickels Store (E-commerce)

currently working

- Developed a robust web application using React for the frontend and Node.js with Express for the backend, providing a seamless user experience
- Utilized Redux for state management, enhancing the application's performance and maintainability by centralizing state logic.
- Implemented a PostgreSQL database to efficiently store and manage data, ensuring scalability and reliability for the platform.
- Established a Continuous Integration and Continuous Deployment (CI/CD) pipeline to automate the build, test, and deployment process, ensuring rapid and reliable delivery of updates
- Implemented security measures to safeguard user data and prevent unauthorized access, ensuring compliance with industry standards and regulations

YODASKILL

www.yodaskill.com

- Developed a campus placement portal using React for the frontend and Node.js with Express for the backend, providing students and recruiters with a user-friendly platform.
- Integrated serverless APIs to handle various functionalities such as user authentication, data storage, and real-time communication, ensuring scalability.
- Designed and implemented time-based exams feature, allowing students to take exams within a specified time frame, enhancing the assessment process.
- Implemented scoring mechanisms to evaluate student performance in exams and provide timely feedback, facilitating better preparation and learning outcomes.

Lionize

Lionize.ai

- I contribute my Efforts on designing and implementation of front-end user interfaces using React.js
- Demonstrated expertise in converting Figma designs into visually appealing
- Integrated Material UI, emphasizing intuitive and visually appealing designs.
