Professional Summary

MERN and MEAN stack developer with 6 years of experience in MERN stack development and 3 years in MEAN stack development. Proficient in building scalable web applications using MongoDB, Express.js, React, Angular, and Node.js. Additionally, I have 1 year of experience as a frontend jQuery developer. Expertise in front-end development with React and Next.js, along with strong back-end integration skills. Passionate about creating optimized user experiences. Seeking a challenging position in Australia to contribute my skills to cutting-edge development projects.

Key Skills

- **Languages & Frameworks:** JavaScript, React, Node.js, Express, MongoDB, Next.js, Redux, Elastic Search, AngularJS 1.4, Ionic Framework, jQuery, Bootstrap 5.3
- **Tools & Libraries:** Git, Gulp, Webpack, GraphQL, REST APIs
- **Other Skills:** Agile methodologies, Unit Testing, CI/CD, AWS, Problem Solving

Professional Experience

Acusensus, Melbourne, Australia
MERN Stack Developer

December 2023 to Current

- Designed and implemented a **micro frontend architecture** to enhance scalability, maintainability, and efficiency across development teams.
- Integrated advanced **security protocols and measures**, including authentication, authorization, and secure data handling, to safeguard the application.

Optum
MERN Stack Developer

September 2017 to December 2023

- Designed secure authentication systems using JWT.
- Managed complex state in React applications using Redux, React Context API, and custom hooks.
- Delivered multilingual applications using **react-i18next** and Next.js built-in internationalization.
- Implemented SSR, SSG, and ISR with Next.js to enhance SEO and performance.
- Built and optimized API integrations using Axios for efficient data fetching and error handling.
- Developed scalable APIs using Node.js, Express, and GraphQL.
- Proficient with MongoDB and Mongoose ODM for complex queries and performance optimization.
- Used techniques like lazy loading, code-splitting, and caching to improve application performance.

Achievements:

- Reduced load time by 30% on key customer pages, resulting in a 20% increase in engagement.

- Led migration from legacy systems to modern MERN stack technologies, including Gulp task upgrades to Gulp 4.
- Mentored junior developers and promoted technical best practices, including the adoption of Next.js.

CallHealth Services Pvt. Ltd
MEAN Stack Developer

November 2015 to September 2017

- Built a self-service mobile interface using Ionic Framework and AngularJS.
- Implemented Elastic Search for faster search functionality.
- Developed REST APIs with Node.js and Sails.js and managed sessions with local storage.
- Utilized promises for asynchronous tasks on both client and server sides.
- Implemented real-time push notifications using Socket.io.
- Integrated device features like camera, GPS, and call functionality.

Tellenium Solutions
Front-end Developer

December 2013 to November 2015

- Built user interfaces using AngularJS and Bootstrap, enhancing accessibility and user navigation.
- Developed custom AngularJS directives for pagination, filtering, and form validation.
- Worked on backend system development with Node.js and handled JSON/XML data for front-end integration.
- Created REST-based controllers to manage data and improve backend communication.
- Developed mobile apps using the Ionic Framework.

Education

Bachelor of Technology (B-Tech) in Computer Science and Engineering
 Jawaharlal Nehru Technological University

2009
