EXPERIENCE

AVSG Info System Pvt Ltd

Web developer

I worked as a web developer at AVSG Info Systems Pvt Ltd. My role primarily involved using the MERN stack to develop web applications. This included creating React-based user interfaces and integrating RESTful APIs. I also contributed to MongoDB database management, troubleshooting, and participated in documentation and testing efforts.

PROJECTS

Face Mask Detection

Designed and implemented a face mask detection system using machine learning techniques to identify individuals wearing a face mask. The project aimed to contribute to the public health measures to prevent the spread of contagious diseases by providing a reliable and efficient way of monitoring compliance with mask-wearing guidelines.

Technologies used : Python, OpenCV, NumPy, TensorFlow

Issue Tracker

An issue tracker is a software tool for managing and tracking project issues. It enables teams to log, assign, and monitor issues until resolution, facilitating organization and collaboration.

Technologies used : HTML, CSS, JavaScript, Bootstrap, Reactjs, Node.js, Express.js, MongoDB.

ACHIEVEMENTS & AWARDS

- ✓ Second Honour | Shri M.P. Dubey Inter College
- I got 2st Position in my 10th exam and got awarded by college

INTERNSHIP

Web Developer

Develop an issue tracker system using the HTML CSS, JavaScript, Bootstrap, MERN, React.js, Node.js, Express.js, MongoDB. The system will allow teams to log, track, and manage software-related issues efficiently.
