SKILLS

·Complex problem solver
·Creative design
·Innovative

COMPUTER PROFICIENCY

Web Technologies:
HTML
CSS
tailwindcss
JavaScript
TypeScript
Node JS
Express Js
React Js
Solidity
Prime React
Next Js
Gatsby

Tools:
Visual Studio Code
Postman
Git
Jira software
Meta Mask
Remix IED
Netlify
Docker
Jenkins
AWS

Database Known:
MySQL
MongoDB

WORK EXPERIENCE

Senior Full Stack Engineer
Sanda Office Management Private Limited
Client: Profound | April 2024 – September 2024
Project:- storyblok.com , token.com, cloudgateway.co.uk

- Developed and maintained MERN stack web applications, optimizing performance and responsiveness.
- Implemented server-side rendering with Next.js for enhanced SEO and faster page load times.
- Designed and integrated RESTful APIs to improve functionality and streamline services.
- Optimized images with lazy loading to boost page speed and user experience.
- Managed AWS services, including S3 for storage and EC2 for scalable deployments.
- Gained DevOps experience by implementing CI/CD pipelines with Jenkins to automate build, test, and deployment processes, ensuring seamless delivery.
- Developed authentication and authorization features to ensure application security.
- Utilized Tailwind CSS for rapid UI development, ensuring consistent design across projects.
- Created dynamic forms using React Hook Form and Formik with robust validation.
- Deployed applications on Netlify, ensuring smooth continuous integration and delivery.
- Expanded DevOps experience by managing Linux-based systems for application hosting, utilizing Docker for containerization to ensure a consistent development environment.

Software Engineer
PrideVel Technologies Limited
December 2022 – December 2023
Projects: web3tech (ExclusiveNFT), mintnow

- Developed and maintained a blog platform using React.js, Node.js, MongoDB, MySQL, and TypeScript for improved type safety.
- Integrated image uploads via AWS S3, enhancing multimedia content management.
- Implemented performance optimizations and bug fixes, improving application stability and speed.
- Used Jira for project management to ensure timely delivery of releases.
- Explored blockchain technologies (IPFS, smart contracts) to improve data security.
- Developed Soul Bound Tokens (NFTs) for unique, verifiable digital assets.
- Contributed to frontend and backend development of web-based applications using React.js and Node.js.
- Performed unit and integration testing to ensure software quality.

Associate Software Engineer
Gupshup Technology India Pvt Ltd
October 2021 – November 2022
Project: superlemon.xyz (Chatbot)

- Developed chatbot solutions using Node.js and MySQL for text and image-based interactions.
- Provided IT support services, including application troubleshooting and bug fixes.
- Assisted with debugging and implementing code fixes to enhance chatbot performance.
- Delivered high-quality application support, improving end-user efficiency.

Software Engineer
Vernost Marketing Technology Solutions Pvt. Ltd
May 2020 – May 2021
Projects: vetravel.io, dadabhaitravel.in, intermiles.com (Travel Domain)

- Developed web applications using React.js, Node.js, MongoDB, and MySQL.
- Created module-specific APIs and utilized Postman for testing and development.
- Collaborated with team members to complete tasks within deadlines and project specifications.

Intern
Vernost Marketing Technology Solutions Pvt. Ltd
February 2020 – May 2020
Project: traveledge.axisbank.co.in (Travel Domain)

- Worked on frontend development using React.js, HTML, JavaScript, and CSS.
- Developed landing page components for flight and hotel modules.
