## PROFILE SUMMARY

I like to solve problems, An Aspiring Javascript developer and a computer science graduate i love to improve my skills to tackle problems that makes life easy for others. That's how ,It makes me a passionate Software developer. I am a developer,skilled with knowledge in full stack development with nodejs,express,Reactjs. I am boot camper at soal where i have experienced industry equivalent coding skills to develop projects. Its my passion that pushes towards coding field right from school time when i was in high school.During graduation i opted for computer science just because it allows me to explore more on coding and development. I have worked on different stack technology like mern stack,Pern stack to develop different kinds of project. My favorite platform is github where i love to push code on daily basis.Slack overflow is like friend to me where i keep answering question and also asking question that makes me curios.

---

## PROJECTS

### InExchange, 476 Days

Insurance Project for Company owners and their occupancies.

### Text Utils, 0 Days

This is a project made purely on react to manipulate the texts. Project Link  
<https://harshrajmishra1995.github.io/TextUtils/>

### Medi Easy, 242 Days

It was Medical Insurance Facility Product for HDFC Life.

### Bank Security Dashboard, 59 Days

This project is developed by me. The tech stacks that I used to develop the project is Reactjs. The project is all about developing the dashboard that shows all the security details of the bank using the easy to use user interface.  
<http://bank.app-assertai.com/>

### Project Netwon, 123 Days

Project is about online school platform built using reactjs

### Payslip pdf generator, 31 Days

This project is all about generating Payslip for the employee in pdf form.

### Jobble, 31 Days

It is a website developed to provide job platform for users who are job seeker or job employer. Concept of the project is to remove biasing malpractice that are being carried out during hiring process, by providing a candidate profile to the recruiter directly. Profile of the candidate is viewed to the recruiter with help of tinder like cards which display candidates profile based on their experience and skill sets. Recruiter can like or dislike the candidate profile by swiping left and right. Messaging option are also available for communication between candidate and the recruiter once the profile is being selected by recruiter. This will remove third party interference during hiring process and both candidate ,recruiter will get the perfect match.
