EDUCATIONS

Electronics And Communication Engineering

Indian Institute of Information Technology
Kurnool, Andhara Pradesh
2018-2022, 7.4CGPA

Intermediate

City Montessorie Inter College, Balrampur
Passout-2017, 87.2%

Highschool

Gandhi Aadras Inter College, Barhni, Siddharthnagar
Passout-2015, 88.0%

PROJECTS

Apex Informatics — Project Management System

Project Management System tailored specifically for the construction of Electric Vehicle (EV) Charging Points. This system streamlined the planning, coordination, and execution phases of the project, ensuring efficient deployment of charging infrastructure to support the growing demand for electric vehicles.

Lumenstocks — STOCK-MARKET Analysis WEB APP

Stock market web application offering stock-related data for multinational companies. The platform provides complimentary access to basic stock information for all users, with premium features available for subscribers. This project aimed to empower investors with valuable insights for informed decision-making in the dynamic global market

Xetlink — WEB AUTOMATION

Develop an integrated solution facilitating seamless participation in Google Meet and BlueJeans meetings, with enhanced features for monitoring and recording. Users can join meetings as a "boat" avatar, gaining access to invaluable functionalities including real-time chat monitoring, participant tracking, and audio/video/screen recording capabilities.

Eno8 — Real Time Stadium Booking

Contributed to the development of the ENO8 web application, which enables users to book stadium slots on an hourly basis. This innovative platform facilitates seamless scheduling for sports enthusiasts, allowing them to efficiently reserve time slots at their preferred stadiums, enhancing their overall experience and convenience.

RESPONSIBILITIES

Developed and maintained server-side logic using Node.js to power web applications, APIs, and microservices.

Implemented RESTful APIs and integrated third-party services to enhance application functionality and user experience.

Optimized application performance by identifying and resolving bottlenecks, improving code efficiency, and implementing caching mechanisms.

Worked with databases like MongoDB, MySQL, or PostgreSQL to store and retrieve data efficiently.
