Objective:

Seeking a challenging role as a React Full Stack Developer where I can utilize my solid foundation in React.js and full stack development to contribute meaningfully to innovative projects. With over 2+years of hands-on experience, my objective is to leverage my expertise in frontend and backend technologies to architect robust and scalable web applications. I am eager to collaborate with cross-functional teams to solve complex problems, drive continuous improvement, and deliver high-quality software solutions.

Summary:

- Proficient in both frontend and backend technologies, with a strong foundation in React.js for building interactive user interfaces and Node.js/Express.js for designing robust backend systems.
- Adept at leveraging React.js to build dynamic and interactive web applications, while maintaining clean and organized code.
- Experienced in implementing backend solutions using Node.js/Express.js and proficient in database management.
- Dedicated to staying updated with the latest technologies and best practices in web development.
- Adept at leveraging React.js to build dynamic and interactive web applications
- Experienced in backend development with Node.js/Express.js, proficient in designing RESTful APIs and integrating with databases.

Education:

B.E (Mechatronics)-PPG Institute of Technology, Coimbatore-(2021)

Experience:

Current company Name **Colan Infotech Pvt Ltd** (Chennai).

Project1:

Project Name : Shopping Buddy
Duration : Aug 2021 – Mar 2023

Responsibility:

- React would be used to create the various components and UI elements of the shopping platform
- This includes designing product listings, shopping carts, user profiles, checkout forms, and any other interactive features.
- React allows for the creation of responsive designs that adapt seamlessly to different screen sizes and devices.
- This ensures that users can access the Shopping Buddy platform comfortably from desktops, tablets, and smartphones.
- React's state management capabilities, particularly with tools like Redux or Context API, would be crucial for managing the application's state, such as user authentication, product availability, and shopping cart contents.
- React allows developers to create accessible user interfaces by ensuring proper semantic HTML, keyboard navigation support, and compatibility with screen readers.
- This ensures that the Shopping Buddy platform is usable by people with disabilities.

Project 2:

Project Name : Travel
Domain : E-commerce
Duration : Mar 2023 –Till now

Responsibility:

- React would be used to create the various components and UI elements of the travel ecommerce platform.
- This includes designing search forms, destination listings, booking calendars, user profiles, payment interfaces, and any other interactive features.
- This ensures that users can access the travel platform comfortably from desktops, tablets, and smartphones.
- React's state management capabilities, particularly with tools like Redux or Context API, are crucial for managing the application's state, such as user session data, selected travel itineraries, and booking details.
- React offers tools and best practices for optimizing performance, such as code splitting, lazy loading, and memorization.
- React components would interact with backend APIs using techniques like fetch requests or Axios for data retrieval and submission.

- React allows developers to create accessible user interfaces by ensuring proper semantic HTML, keyboard navigation support, and compatibility with screen readers.
- React can be used to integrate with third-party services such as payment gateways, booking systems, and mapping APIs to enhance the functionality of the travel platform and provide additional services to users.

Skills:

- HTML
- CSS
- JavaScripts
- React.js
- Node.js
- Express.js
- MySQL
- PostgreSQL
- Postman
- RESTful APIs
- Redux
- mongodb
- Python
- GitHub

Declaration:

I hereby declare that the information furnished above is true to the best of my knowledge and belief.
