PROJECT(S) EXPERIENCE

★ OffersHaat - (Web application | Live) :

Designed and developed the OffersHaat web application for providing top offers of different e-commerce platforms under one hat. It basically provides current offers of different products from Flipkart, Amazon, Myntra, Nykaa Fashion, TATA Cliq, AJIO, Shopee, and other top e-commerce companies.

Key Functionalities: OffersHaat :

- At OffersHaat, users get pleasant and fast UI experiences to access different products of different e-comm. platforms,
- It is featured with a fully functional admin panel to manage all the offers links across the OffersHaat platform,
- It is well capable in detecting expired offers & offers that are about to expire,
- Users are getting top discounts and offers by accessing different products of different e-commerce platforms,
- Used PHP, Laravel framework, HTML5, CSS3, Bootstrap with MySQL database for performing CRUD operations and functioning the webapp.

★ MeIndust (Web-application | Live) :

MeIndust is used to list down all the products available for sales in the company. The client uses this platform to showcase, add, update, and explain the features of their listed products to their buyers.

Key Functionalities: MeIndust

- At MeIndust, users get fast UI experiences to check and know about the listed products,
- Provided admin panel for performing all crucial CRUD operations to showcase the product on User Interface.
- Used PHP, Laravel framework, HTML5, CSS3, Bootstrap with MySQL database for performing CRUD operations and functioning the webapp.

★ DevisInfotech (Website | Live) :

Designed and developed a cross-platform and multi-device responsive website for a Software development company - DevisInfotech. This site represents the DevisInfotech companies' services related details.
