## EDUCATION

---

**UIET MDU, Rohtak**  
*Btech in Computer Science*

2016 - 2020  
Percentage: 72%

## SKILLS

---

<b>Programming Languages</b>	HTML, CSS, JavaScript, Java, TypeScript
<b>Frameworks &amp; Libraries</b>	React, NodeJS, ExpressJS, Angular, Spring Boot
<b>Databases</b>	MySQL, MongoDB
<b>Tools</b>	Git, VSCode, IntelliJ IDEA

## EXPERIENCE

---

**Nagarro**  
*Software Engineer*

Oct 2020 - Nov 2023  
*JavaScript Simplifier, SQL*

- Utilized Simplifier, a rapid-application development platform, to create dynamic web applications.
- Effectively oversaw Jira tickets with meticulous attention, ensuring smooth project execution.
- Pioneered notable features, such as QR code scanning for webcams and a user-friendly drag-and-drop ticket management system.
- Designed complex XML structures for a large-scale application focused on machine metadata management.
- Spearheaded rapid-application development projects, streamlining data management processes.
- Successfully addressed Jira issues through systematic replication and diagnosis of root causes, collaborating with the team to implement effective solutions.
- Led research and development initiatives, integrating advanced functionalities like Twilio, Google Maps, and OCR for enhanced capabilities.

## PROJECTS

---

### Flavor Fiesta

<https://flavor-fiesta-frontend.vercel.app/>

React, NodeJS, MongoDB, ExpressJS, Cloudinary, Redux, Socket.IO and Stripe Payment Gateway

- Conceptualized and developed a dynamic fast-food ordering web app featuring user registration, login with JWT token authentication, and real-time order tracking using Socket.IO
- Implemented an intuitive admin interface for efficient product and order management, showcasing adeptness in full-stack development.

### Explorer

<https://explorer-frontend-one.vercel.app/>

React, NodeJS, MongoDB, ExpressJS, Cloudinary, ContextAPI

- Orchestrated the creation of a captivating social-media web app, enabling users to post, like, and comment on content.
- Innovatively integrated a real-time weather information display, enhancing the overall user experience and showcasing proficiency in front-end and back-end technologies.

### ByteCanvas

<https://byte-canvas.vercel.app/>

React, TailwindCSS, Redux and Appwrite

- Conceptualized and developed a feature-rich blogging application facilitating user registration, login with secure authentication, and seamless blog creation and consumption.
- User-friendly interface with TinyMCE editor for rich content creation, and seamless image upload feature for visually enhanced blog posts.
