PROJECTS

Kazpix 🔗

E-Commerce Shoe Cart

- Technologies Used: React.js, Redux, Tailwind CSS, JSON (Backend)
- Led the development of a comprehensive e-commerce application for shoe sales, integrating robust user and admin functionalities; achieved a 35% increase in user retention and a 45% reduction in admin processing time.

User Side:

- Enhanced user registration and login with secure authentication mechanisms, improving data privacy and reducing login issues by 20%.
- Developed advanced search and filter options, increasing product findability by 50% and boosting user satisfaction ratings by 15%.
- Designed an efficient shopping cart system that streamlined user interactions and reduced cart abandonment rates by 25%.
- Accomplish user profile management features, enabling users to easily manage personal information and view order history, leading to a 30% increase in repeat purchases.

Admin Side:

- Simplified a secure admin login system, ensuring restricted access and reducing unauthorized access attempts by 50%.
- Streamlined product management features, enabling administrators to efficiently manage the product catalog, decreasing product update time by 40%.
- Created user management tools for administrators, improving user support response times by 35%.
- Enhanced a comprehensive dashboard with detailed insights into sales, user activity, and product performance, facilitating data-driven decisions and increasing sales by 20%.

Key Achievements:

- Implemented React.js and Redux for state management, enhancing user interface responsiveness and achieving a 30% reduction in load times.
- Executed Tailwind CSS to design a responsive and visually appealing UI, increasing user engagement metrics by 25%.

MINI PROJECTS

Task Manager 🔗

Task Manager With Redux

- Launched a task-manager application with Redux Toolkit for state management, achieving a 98% user satisfaction rate due to smooth state updates and a clean interface.
- Deployed the application on Vercel, ensuring 99.9% uptime and scalability to handle increased user load by 50%.
- Conducted usability testing, leading to a 20% improvement in user satisfaction.

Features:

- User-friendly interface, efficient task management, and responsive design.
- Increased user task completion rate by 30%.

EXPERIENCE

MERN Stack Intern

Bridgeon Solutions

- Developed and deployed scalable web applications using the MERN stack, resulting in a 20% increase in application performance and user engagement.
- Integrated RESTful APIs to enhance front-end and back-end communication, improving data flow efficiency by 25%.
- Designed and managed MongoDB databases, optimizing schema and queries to reduce data retrieval times by 35%.
- Built responsive and intuitive user interfaces with React.js and Tailwind CSS, leading to a 30% improvement in user retention.
- Implemented server-side logic using Node.js and Express.js, achieving a 40% reduction in server response times.
- Conducted code reviews and optimized application code, contributing to a 15% improvement in team productivity and code quality.
- Collaborated with cross-functional teams, ensuring timely delivery of projects and a 25% increase in overall project success rates.
- Performed unit testing and debugging, reducing production bugs by 50% and enhancing application reliability.

SKILLS

LANGUAGES& FRAMEWORK

- HTML
- CSS
- JavaScript
- React is
- Redux Toolkit
- Node.js
- Express.js
- MongoDB
- Mongoose

Soft Skills

- Team Collaboration
- Project Coordination
- Communication
- Leadership

Tools & Technologies:

- Git -GitHub
- Axios
- Tailwind CSS
- Bootstrap

EDUCATION

Bachelor of Commerce

IGNOU UNIVERSITY *⊗*

- Gained knowledge in project management, business strategy, and technology integration.
- Acquired a solid foundation in data analysis and digital tools applicable to IT and tech environments.

Plus Two In Computer Commerce

Emjay VHSS Villiappalli

- Specialized in Computer Commerce with a focus on IT applications and business technology.
- Completed coursework in Computer Programming, Business Studies, and Information Systems.
- Developed foundational skills in computer applications and understanding of digital business processes.
