WORK EXPERIENCE

Full-Stack-Developer

ITC Infotech

09/2023 - Present

BANGALORE

Achievements/Tasks

- Collaborated directly with clients to gather requirements, provide updates, and ensure timely delivery of solutions.
- Designed and developed end-to-end web applications using Next.js, React, and Node.js.
- Integrated RESTful APIs and ensured seamless client-server communication.
- Optimized application performance and scalability through efficient coding practices.
- Delivered high-quality, client-focused solutions by maintaining clear communication and addressing feedback promptly.

Teams Notification Automation for ServiceNow

Workplace/Company

Achievements/Tasks

- **Description:** Automated notifications for key ServiceNow events (ticket reopen, new ticket creation, ticket unassigned, ticket upgraded) to Microsoft Teams, ensuring real-time communication for ticket management.
- **Dashboard Development:** Built a dashboard using Next.js and shadcn for monitoring ticket activities.

Frontend-Developer

PW (PhysicsWallah) -Internship

02/2023 - 07/2023

Achievements/Tasks

- Built responsive and dynamic UIs using React, Tailwind CSS, and Shadcn.
- Integrated APIs to fetch and display data seamlessly.
- Developed reusable components to improve code efficiency and maintainability.
- Optimized performance with lazy loading, memoization, and code splitting.

PERSONAL PROJECTS

NAMMA-STORE (01/2025 - Present.)

- **Overview :** Developed a luggage storage platform allowing users to store their belongings on a daily or monthly basis. The project includes an admin dashboard for managing stores, receiving orders, and overseeing operations.
- **Features :-**
- **Authentication :** Implemented user authentication with sign-up/sign-in functionality, Google Authentication (GAuth), and OTP verification using Nodemailer.
- **Location Services :** Integrated Google Maps API for location display and autocomplete for enhanced user experience.
- **Image Management :** Used Multer for image uploads and Cloudinary for storage and real-time access
- **Real-Time Data :** Leveraged MongoDB Atlas for dynamic data management and updates.
- **Security :** Utilized JWT authentication and custom middlewares for secure API communication.
- **Admin Dashboard :** Enabled store management, order reception, and operational insights for admins
- **UI :** Built a responsive and interactive user interface using Shadcn and Tailwind CSS.
