📍 116/926 Roshan Nagar Rawatpur Gaon Kanpur

## SUMMARY

Development, unit-testing, and deploy web applications using PHP and Laravel framework. Collaborate with cross-functional teams to define, design, and ship new features. Maintain and optimize existing codebase for improved functionality and performance. Troubleshoot, debug, and resolve software defects and issues. Implement security and data protection measures within applications. Stay updated on industry trends and best practices in PHP and Laravel development. Requirements: Two year of professional experience in PHP development, with a focus on Laravel. Strong understanding of MVC architecture and object-oriented programming (OOP) concepts. Proficient in database design and SQL, with experience using MySQL or similar databases. Familiarity with front-end technologies such as HTML, CSS, and JavaScript. Experience with version control systems, preferably Git. Knowledge of RESTful API development and integration. Ability to work independently and collaboratively in a team environment. Strong problem-solving and communication skills. Up-to-date knowledge of PHP and Laravel advancements.

## EXPERIENCE

### Junior Laravel Developer

#### K2 Technologies

📅 2024 - 2025    📍 Kanpur, India

**Project Name:** Employee Management System (EMS)

**Role:** Development and unit testing

**Technologies Used:** PHP, Laravel Framework, MySQL, HTML, CSS, JQuery, Ajax

#### Project Description:

The Employee Management System (EMS) is an all-in-one solution designed to streamline the management of employee records, attendance, salary, tasks, leave, and HR-related processes. It enables efficient handling of employee data, order confirmations, task assignments, and asset management, while automating HR workflows such as interview scheduling, payout processing, and resignation handling.

#### Key Features and Responsibilities:

- **Employee Record Management:** Developed a module to manage and store employee personal and professional details, including name, contact information, and addresses.
- **Attendance Management:** Implemented attendance tracking system to log employee daily attendance and calculate working hours.
- **Task Assignment:** Created a task management system to assign tasks to employees and monitor their progress.
- **Salary Management:** Automated payroll and salary calculations based on attendance and other parameters.
- **Leave Management:** Built a leave management module to track employee leave requests, approvals, and balance.
- **HR Operations:** Integrated functionality for interview scheduling, employee payouts, and automated resignation processes.
- **Order Management:** Developed a feature for generating and confirming employee orders related to business processes.
- **Asset Management:** Managed and tracked company assets assigned to employees.
- **System Integration & Optimization:** Worked on seamless integration of various system modules for smooth functionality and improved system performance.
