## Profile Summary

Full-stack software engineer with 3 years of experience in React JS, Redux, strong analytical and problem-solving skills, and proficiency in C, C++ and core Java. Motivated to deliver high-quality solutions and continuously expand my skill set to contribute to a dynamic team.

## Experience

- Cognizant Technology Solutions** Programmer Analyst  
Pune 07/2022 – 09/2024
  - Worked on a Banking Web Based application.
  - Spearheaded the development of a user-friendly web application enabling U.S. Bank users to seamlessly transfer and manage payments.
  - Leveraged my expertise in React Hooks, proficiently handling side effects, utilizing Context API, integrating Redux for state management, and implementing MongoDB for efficient data storage.
  - Played an integral part in the testing phase, ensuring the reliability and functionality of the application across various scenarios.
  - Demonstrated a commitment to inclusivity by implementing NVDA features, enhancing accessibility for physically disable individuals to navigate and utilize the application effectively.
  - Exhibited proficiency in responsive development techniques, contributing to the seamless adaption of various project components across different devices and screen sizes using React JS.
- Cognizant Technology Solutions** Programmer Analyst Trainee  
Pune 01/2022 - 06/2022
  - The project aims to enhance the Claims Management functionality of a leading Healthcare Management Organization.
  - This transformation is designed to improve operational efficiency and provide a more streamlined experience for members through the development of a Member Portal.
  - Implemented different features in portal will allow members to easily submit and track claims, view claim status, and access bill-related information.
