TECHNICAL SKILLS

Front-End - JavaScript, Next.js, React.js, Redux, HTML5, Tailwind CSS
Back-End – Node.js, Express.js
Databases – SQL Server, MongoDB
DevOps & CI/CD – GitHub, Azure
Cloud – AWS-S3
Design - Canva

EXPERIENCE

- Software Engineer – Providence Adworks

Nov 2024 – Present

 - Developed scalable backend APIs using **Node.js** and **Express.js**, implemented **Razorpay payment gateway** for payment processing, including EMI options.
 - Integrated robust authentication mechanisms for backend APIs to enhance security and user data protection.
 - Configured and managed **AWS S3 buckets** for secure storage of images and videos.
 - Built dynamic and responsive user interfaces with **Next.js** and implemented efficient state management using **Redux Toolkit** for cart functionality.
 - Built static landing pages** for outdoor sites, **created PPTs for presentations**, and **designed Instagram posts for ad campaigns** to support **marketing efforts**.
- Associate Software Engineer - Laminaar Aviation Infotech

Mar 2022 – Nov 2024

 - Developed and integrated **15+ React UI** components for ARMS Products (NG, ATSM, Mobile & Tab), improving user interface consistency and functionality.
 - Developed and implemented **RESTful API's** in **Node.js** and **Express.js**, adhering to the **MVC architecture**, which improved maintainability.
 - Utilized **Redux** for efficient state management, ensuring seamless data flow across **React components**
 - Created **SQL database tables** and **stored procedures**.
 - Worked on improving how fast key applications load, cutting load times by 20%, and making experience better for clients.
 - Gained hands-on experience with **deployment processes** and **cloud management**.
- Business Development Trainee – BYJU's

Mar 2021 - April 2021

 - Contributed to **market research** and **client engagement** efforts, gaining valuable experience in understanding customer needs and enhancing **communication skills** in a fast-paced environment.

PROFESSIONAL TRAINING

- Newton School

May 2021 – Feb 2022

 - Completed a comprehensive 9-months training in **Data Structure** and **Full-Stack Web Development**.
 - Acquired hands-on experience with the **MERN stack**, building scalable applications and **RESTful APIs**.
 - Participated in live projects and received continuous mentorship, refining skills in both **frontend and backend development**.

ADDITIONAL SKILLS

Scrum & Agile Development Methodologies | Project Deployment & Solution Optimization | Problem-Solving & Analytical Skills | API Security & Compliance | Responsive Web Design

EDUCATION

Bachelor of Technology in Computer Science

Dr. A.P.J Abdul Kalam Technical University

Aug 2016 - Sep 2020
