## Summary :

Frontend Developer with over 1.5+ years of experience specialising in React.js, Redux, JavaScript (ES6+), HTML, and CSS. Adept at creating efficient, scalable, and responsive web applications with a focus on performance optimisation, state management, and enhancing user experience.

## EXPERIENCE

### Future Collabartion pvt ltd

(January2023 - Present)

#### Frontend Developer:

- Led the development of 5+ high-traffic web applications from concept to deployment using React and Node.js, implementing scalable, maintainable code to ensure responsive, fast, and secure applications.
- Created advanced data tables using React Table, handling datasets with over 100,000 entries, and integrated features like expandable rows, customizable columns, and real-time updates, boosting user satisfaction by 25%.
- Developed custom sorting algorithms and advanced filtering options, improving data accessibility by 30% and reducing search time by 40%.
- Integrated efficient pagination, reducing load times by 50% and enhancing overall application performance.
- Designed and implemented RESTful APIs for CRUD operations, seamlessly connecting front-end with back-end services and ensuring data consistency and integrity, reducing error rates by 20%.
- Collaborated with UX/UI designers to align table design with application aesthetics and user experience goals, participating in 10+ design reviews to iterate on table designs and meet user needs.
- Employed responsive design best practices to ensure data tables function well across different devices and screen sizes, enhancing accessibility and user satisfaction by 35%.
- Maintained and optimized application performance, continually improving data display efficiency and user interaction through regular updates and enhancements.

## Technical Skills :
