## WORK EXPERIENCE

### ALGOUNIVERSITY

#### || EXTERNSHIP

📅 Nov 2022 – Present | Remote

- Created a **HLD Document** from scratch before building a **Scalable** Full Stack MERN Application called **CodeRaider** that is comparable to Leetcode and HackerRank. 🌐 Github Repo 🚀 Live Link
- Leveraged **React.js** & different JS packages for developing frontend part, **Node.js** & **Express** framework for server part and **MongoDB** for the database part.
- Created 3 **independent services** mainly for frontend, server & database and then containerized them using **Docker**.
- As a result of orchestrating these 3 containers together, we are able to create a **scalable** Full Stack Application which is deployed on **AWS**.

### COGNIZANT

#### || ASSOCIATE

📅 Apr 2023 – Present | 📍 Gurugram, India

- As a part of the Sales and Post-Sales team, got the **opportunity to lead a team of 3 members** to work on a critical functionality of developing a user guided flow for **Sky Italia's** (our client, a media and entertainment company) **Service Centers**.
- Increased functional test case coverage from **65% to 92%**.
- Working with the Integration team, to fetch details from Logistic API and then map this **Json** data to required fields throughout the CRM.

#### || PROGRAMMER ANALYST

📅 Apr 2022 – Apr 2023 | 📍 Pune, India

- As a part of the Sales/Post-Sales team, implemented various critical flows which are being used by **Sky Italia** for troubleshooting & resolution of their customers' problems.
- Worked with the Order Management team to process customers' orders by an **efficiency rate of 30%**.

#### || PROGRAMMER ANALYST TRAINEE

📅 Mar 2021 – Apr 2022 | 📍 Pune, India

- As a part of the Sales/Post-Sales team, developed an **automated email response system** when particular criteria is met using Salesforce flows.
- Played an important role in the development of nearly **95% of all custom email templates** for every kind of business scenario using Salesforce classic email templates.

## NOTABLE PROJECTS

### PLACEBOOK

🌐 Github Repo

- A **MERN** stack based application for sharing & viewing places a person has visited.
- Leveraged **JWT** for authentication & authorization.
- Users can **upload** a photo of the place they have visited.
- Users can perform **CRUD** operation of places api/service.
- Leveraged **Docker** for isolation of services & **AWS** for deployment.

## EDUCATION

### STATE INSTITUTE OF ENGG. & TECH.

🎓 B.TECH IN CSE

📅 Aug 2016-Sep 2020 | 📍 Nilokheri,HR  
Percentage: 76.21%

### SD MODEL SR. SEC. SCHOOL

🎓 CLASS XII

📅 Apr 2014-Mar 2015 | 📍 Karnal,HR  
Percentage : 75%

## SKILLS

• Java 8 • HTML • CSS • JavaScript • Node.js • React.js • Git & Github • MongoDB • AWS(Basic) • Docker • REST API • ALM Octane

## COURSE WORK

- Data Structure
- Design & Analysis of Algorithms
- Object-Oriented Programming

## CERTIFICATIONS

- **Web Development** using **React.js** and **Node.js** from Udemy.
- **JavaScript** Bootcamp from Udemy.

## HONORS

- Awarded **Bronze Medal** for Outstanding contribution to achieving a successful go-live of the first launch of the new application of **Sky Italia** by **Cognizant**.
- Recognized by Project Manager for working on and delivering the **critical functionalities** for production environment.

## ACHIEVEMENTS

- Secured **Global Rank 8** in CodeChef January Long 2022 - II
- Secured **Global Rank 242** in CodeChef August Challenge 2021
